

# Sustainable Solutions Corporation

## Sustainable Building Operations and Maintenance

Building owners and property managers are realizing the increasing value of optimizing the efficiency of their buildings. Sustainable building improvements provide cost savings while increasing market appeal and occupant comfort. Sustainable Solutions Corporation leverages decades of experience in Sustainable Building Operations to provide training that delivers maximum participant benefit. Tailored to the specific building, this training focuses on three key factors:

### Sustainable Operations

- Reduced costs and improved operations efficiencies including reduced water, waste, and energy consumption.

### Building Performance Measurement and Benchmarking

- Tools and insight to significantly reduce operating expenses and realize bottom line savings.

### Sustainable Facilities Management

- Developing and implementing strategic sustainability programs.

### Client Success

During 2010 and 2011, approximately 6,000 CertainTeed employees received Sustainable Operations Training which has helped drive reductions in energy by 15%, water by 24%, and waste by 33%.

*"Our increased emphasis on sustainability has helped us identify and implement critical initiatives that reduce water and energy use as well as divert waste from landfills. We have learned that even simple modifications can have a big impact."*

**Chris Altmansberger, (Former) Vice President of Operations Support and Process Sustainability**  
CertainTeed Corporation

### Objectives:

- Optimize building performance
- Increase occupant comfort
- Generate cost savings
- Foster ongoing improvement
