

Sustainable Solutions Corporation

Succeeding in Today's Global Supply Chain

Navigating Walmart's Sustainability Index

What steps are you taking to secure your role in today's – and tomorrow's – global supply chain?

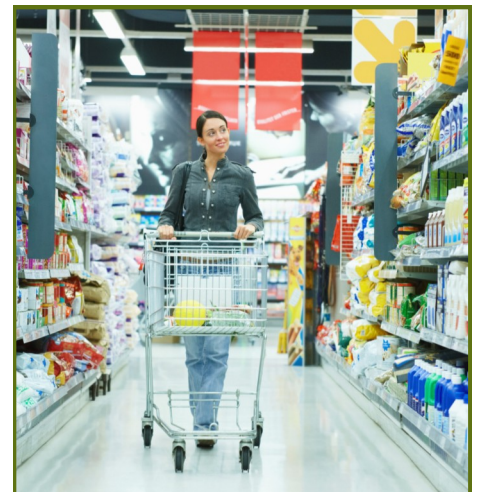

Recent releases from Walmart regarding its supplier requirements affirm that the world's largest retailer is heightening its commitment to creating a sustainable global supply chain. The application of The Sustainability Consortium's (TSC) Sustainability Index provides a tool for suppliers to measure and report their relevant environmental impact data. In addition to the Sustainability Index, Walmart has added specific sustainability objectives to the annual evaluations of their purchasers. To date, the Sustainability Index has been released to 500 suppliers in 100 different categories. In 2013, Walmart aims to release the Index in another 100 buyer categories. The ultimate goal is to **source no fewer than 70% of goods sold in Walmart and Sam's Club U.S. stores from suppliers using the Index.**

Leading companies have already been responding to the Sustainability Index and realizing bottom line growth. Sustainability is becoming a discipline that supports a profitable business plan; much like finance, sales or IT. Navigating the Index, however, can prove difficult... so turn to the sustainability experts – **Sustainable Solutions Corporation (SSC)** – to not only assist with compliance, but help you achieve *savings through sustainability!*

Utilizing years of experience and industry leading expertise, SSC is recognized as a trusted advisor that provides a 'turn-key' operation for our clients. Through collaboration with hundreds of clients, we have developed a system designed for optimal performance and maximum return on investment.

SSC Can Assist You With:

- Life Cycle Assessment and Environmental Product Declarations
- Greenhouse Gas Inventory
- Carbon Disclosure Project (CDP) Reporting
