Waste Diversion from Landfill

With a growing focus on responsible material management, many businesses are facing increasing pressure to reduce waste generated from operations and to divert waste from landfills. Forward-thinking organizations understand that reducing all forms of waste is crucial to an effective and sustainable business strategy. SSC's waste training will help employees implement more efficient practices to meet waste diversion goals.

Waste reductions stem from advanced processes, material choices, and waste handling. These initiatives result in significant impact and cost savings.

Benefits of Waste Diversion

Cost Reduction

Implementing an aggressive waste prevention and source reduction program will increase efficiency and reduce overall costs.

Marketing

While other sustainability initiatives can be difficult to convey to the average consumer, waste diversion from landfill is straightforward and relatable. End-of-life material management resonates with consumers.

Objectives:

- Identify and reduce waste sources
- Achieve waste diversion or zero waste goals
- Communicate waste diversion successes

Formats:

Style	Time
Online	1-1.5 hours
Onsite	1-4 hours
